

 **GESTURES** OF STYLE

Gestures of style

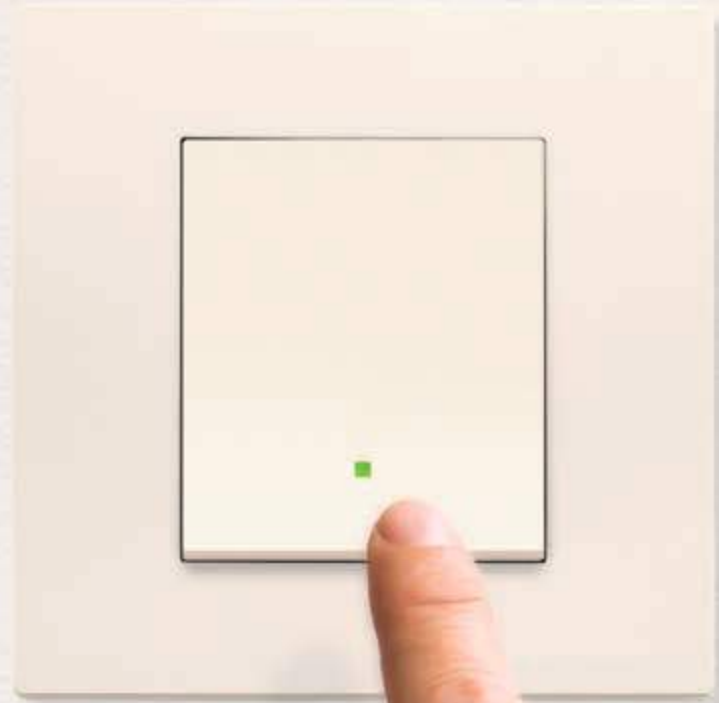

Gestures of style

Our products celebrate the progress made by changing lifestyles.

Souls that differ in their design and finishes, harmonious geometric shapes designed to liaise constantly in order to provide comfort, energy efficiency and safety. We tend to every project with care, to incorporate them with versatility and add value to every living space.

Beauty in everyday actions to manage your home, your office, hospitality venues and public or commercial spaces.

Our commitment for the future. Sustainability

Environmental awareness and climate change are concerns, that above all, will effect future generations.

This is why we have adopted a circular economy model that guides our design thinking and processes. We have chosen positive energy.

We certify our commitment to environmental, economic and social sustainability. The Linea series is a virtuous example.

Integration

Vimar View

High-tech solutions, both wired and connected, to control a wiring system using the interfaces on your smartphone, or voice controls. We design home and building automation systems with international protocols and standards, which are integrated with video door entry, burglar alarm and CCTV systems. They can be easily integrated with other building management systems.

Every project deserve its own technology. Supporting your everyday actions in every environment

Standard Electrical
Installation

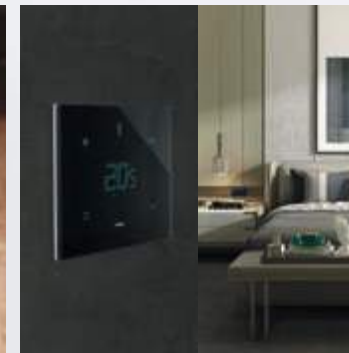

Advanced Electrical
Installation

Connected Smart
Installation

Integrated Automation
systems

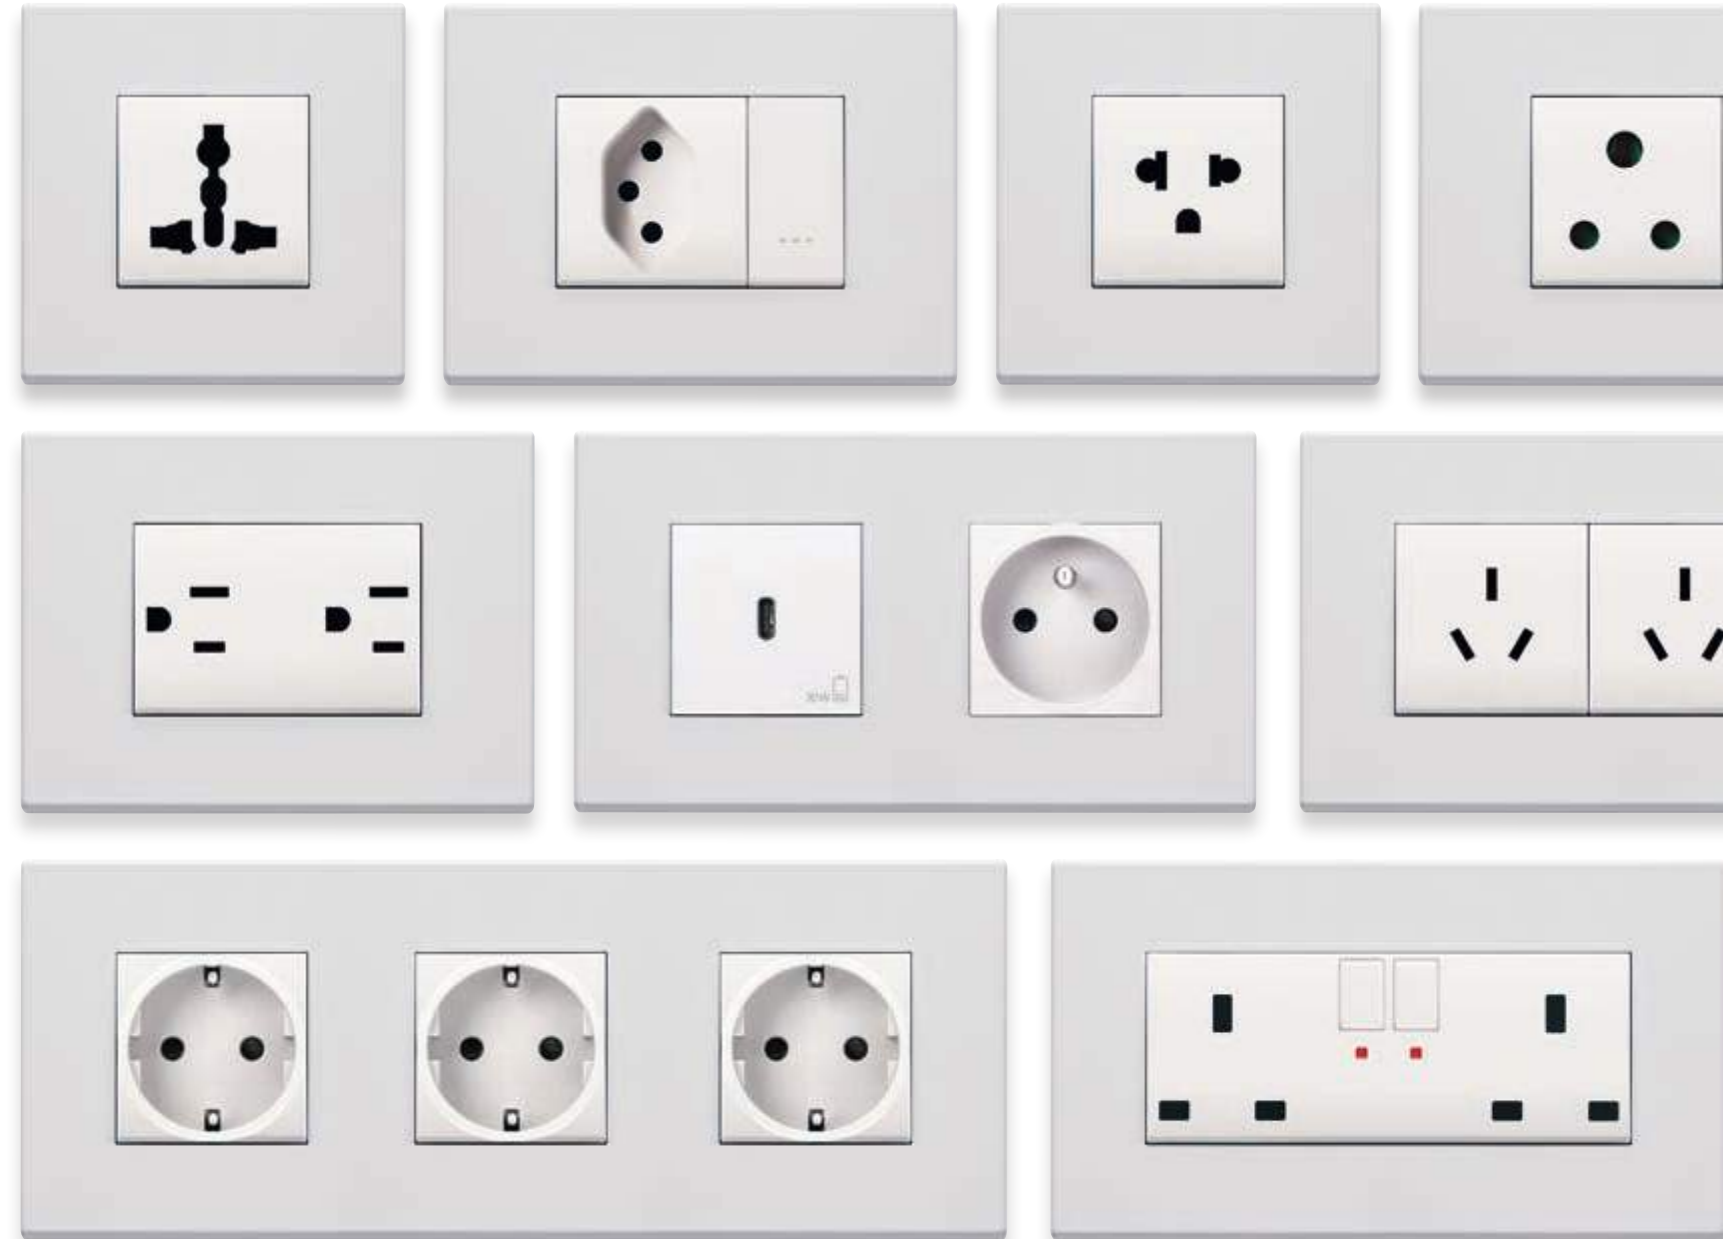

Thanks to our comprehensive range of functions your electrical installation projects have greater comfort, more efficiency, less energy consumption and more connections. At home, in the office, as well as in hotels.

Add smart functions to control the status of lights, the position of curtains and motorised roller shutters, as well as temperature, accesses and energy loads, wherever you may be.

Add for examples connected dimmers, UWB presence or radar sensors.

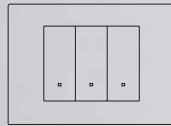

More than 200 functions to choose from
international standards, modular and versatile solutions

Eikon Exé.

Expression of elegance, prestige, technology and innovation

Traditional controls

Vintage controls

Flat controls

Tondo controls

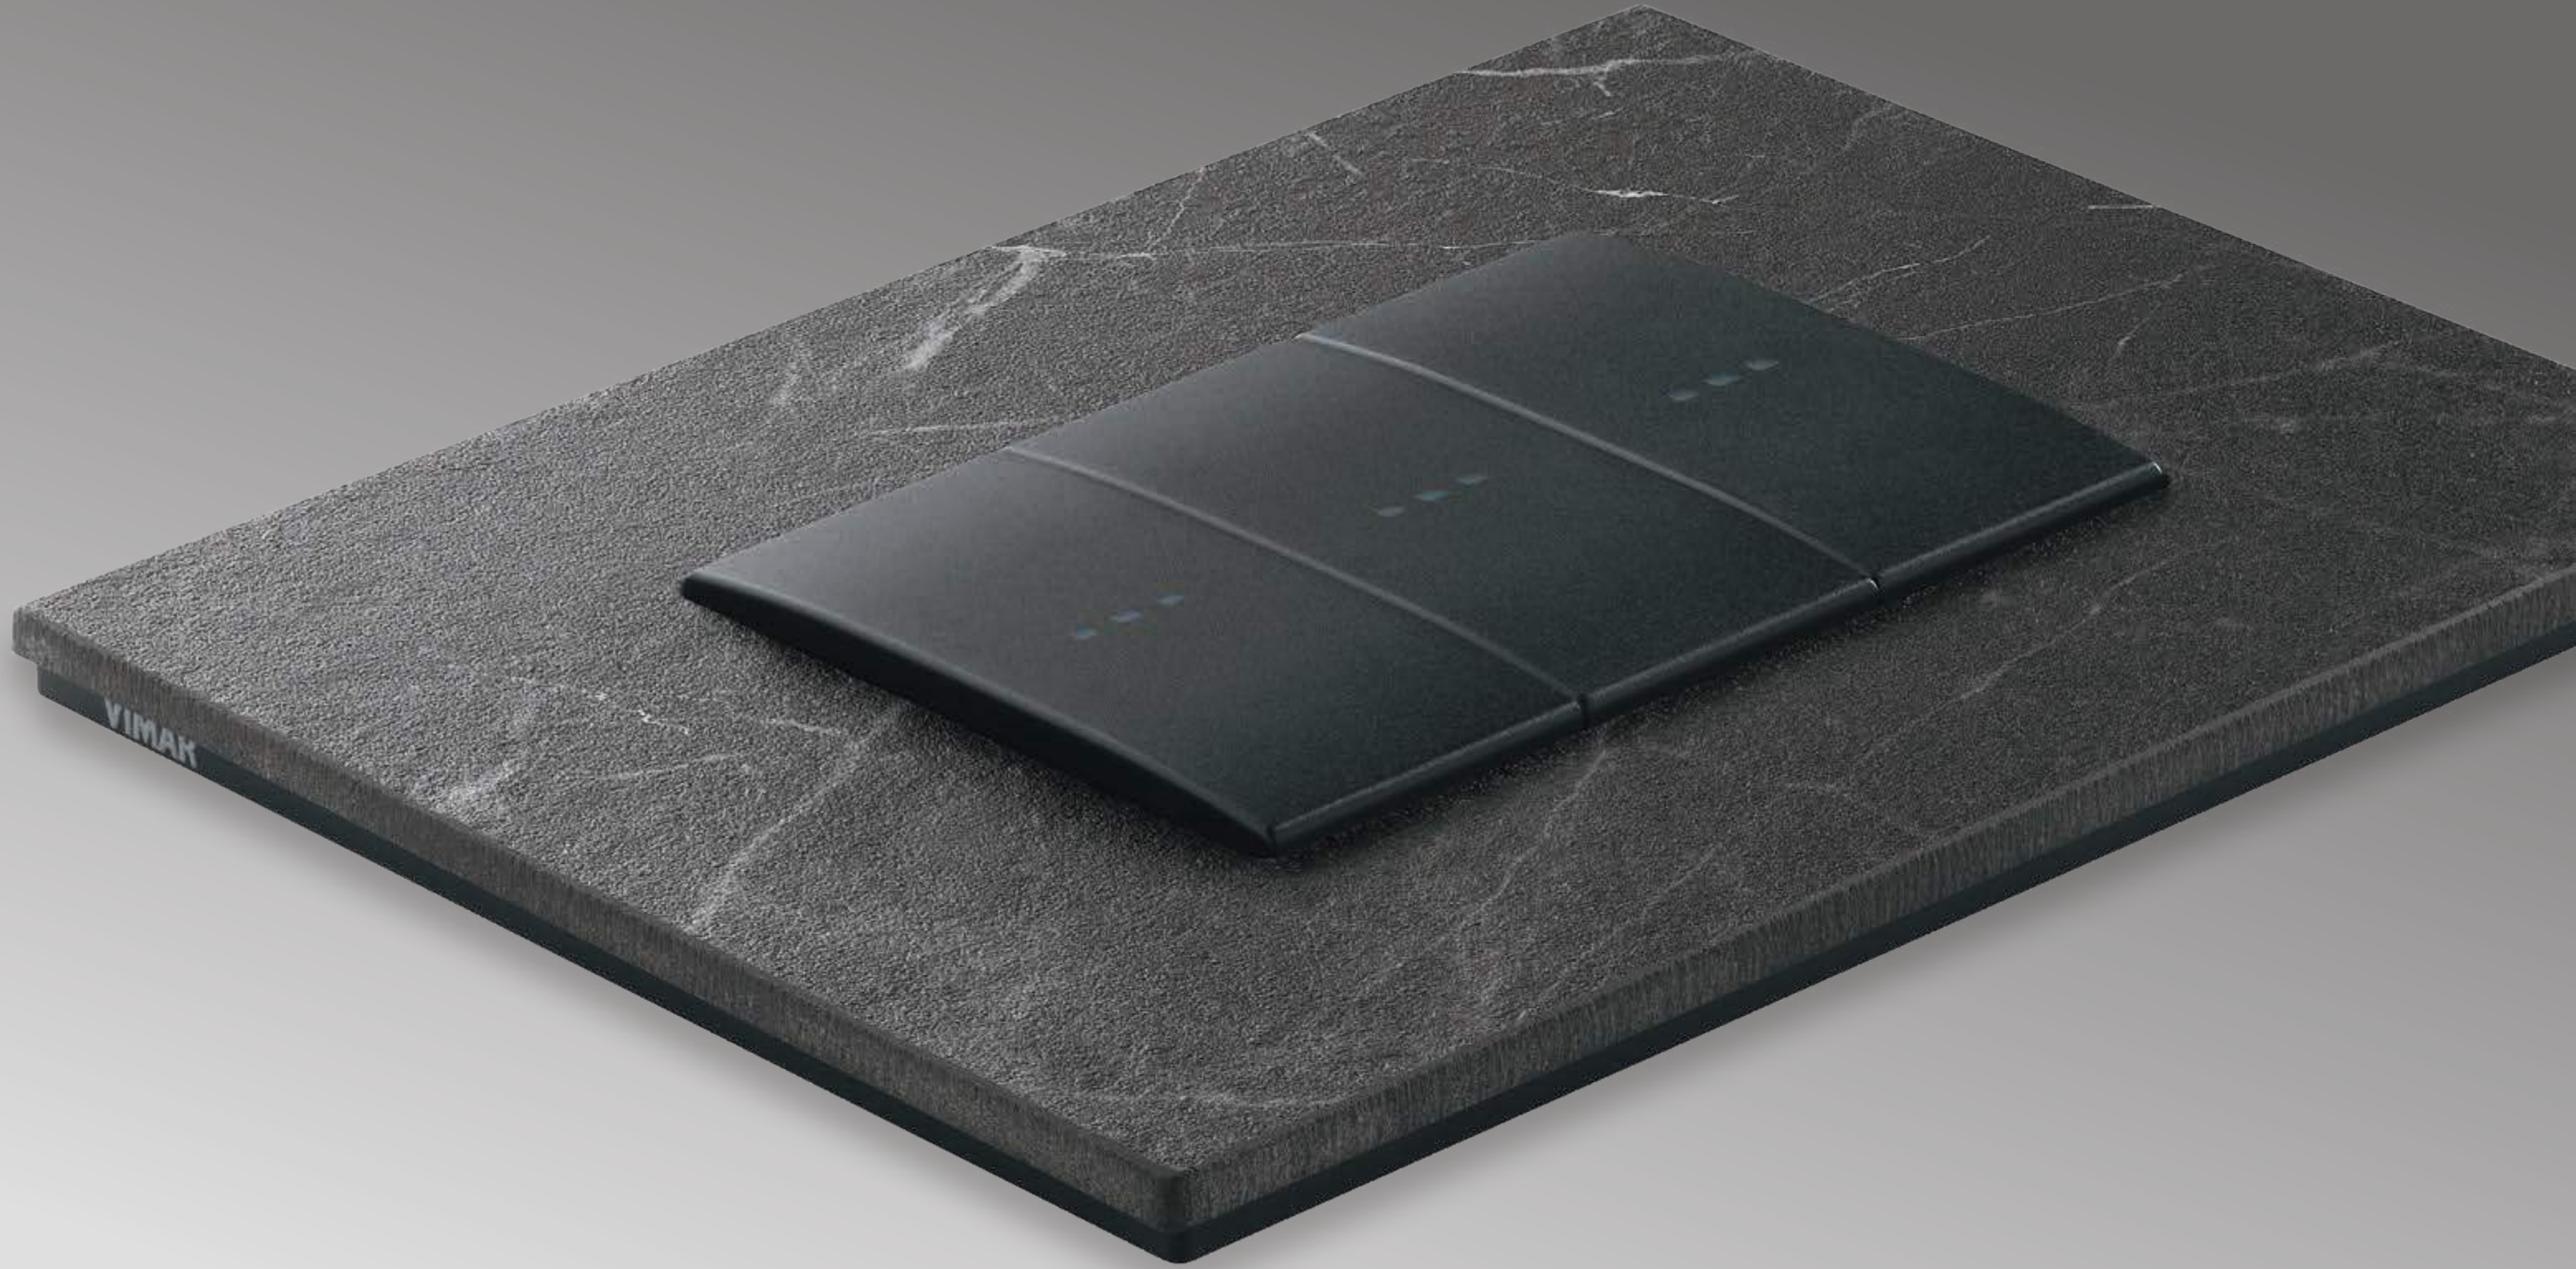

Impeccable looks and advanced features combine to produce simply extraordinary results. The Eikon Exé wiring series stands out for its design and finishes with high technology solutions devised to evolve side-by-side with lifestyles, making the electrical system unique. It's designed to be sustainable.

Eikon Exé

Pure essence of form and material. Slim profiles to emphasise the design. Precious materials and choice finishes that embrace squared corners and striking silhouettes for a cover plate that blends in seamlessly in any setting, creating an original look every single time.

Tondo

Elegant and discreet. The base of the control is backlit, creating a very distinctive halo between the button and the plate. The buttons are different depending on whether a traditional or home automation wiring system is used, in order to have an optimized look depending on the device.

Vintage

The mesmerising silhouettes of the past have been restyled with a modern twist to give settings an exclusive, slightly retro style. They offer perfectly matching styling, sophisticated yet at the same time pure and linear, between the controls and the Eikon Exé cover plate in the same finish.

Flat

The squared, flat shape of the controls affords a pleasant effect flush with the surface to emphasise the textured appeal of the cover plate. When teamed with the respective Eikon Exé cover plate, they generate an elegant Total Look with simple silhouettes and clean-cut geometries.

Blending in seamless with the architectural design. With flush mounting installation it's perfectly aligned with the wall without protruding in any way, thereby achieving an even more clean-cut look capable of enhancing the value of any environment.

The beauty of bespoke.

Make your wiring system unique. Exclusive possibilities

The Eikon series offers a comprehensive range of solutions to customise your system and strike the perfect balance between styling and technology. Special finishes, countless colour combinations for both cover plate and buttons, customised symbols associated with controls, and logo engraving on the cover plate.

Customize cover and controls

- > Choose the colour of the cover plate
- > Match the colour of the button

Choose from our special finishes

- > Decide on your finish

Personalize and make it yours

- > Engrave your logo
- > Customise your controls

Special materials and more colours for every interior. Infinite possibilities, exclusive opportunities

In response to new interior design trends, Vimar offers the possibility of not only choosing premium new materials with touch technology, but also customizing wiring accessories by selecting the colour of the cover plate and internal/external frame.

Cover plates in over 200 colours

In addition to the existing range of colours in the catalogue, with the Eikon Evo and Eikon Exé series in metal, you can choose to paint the cover plate, in a special RAL K7 specification, that best matches the style of the building. An exclusive opportunity designed to meet the latest stylistic trends and enhance the architectural design.

Precious surfaces.

Uniqueness lies in attention to detail

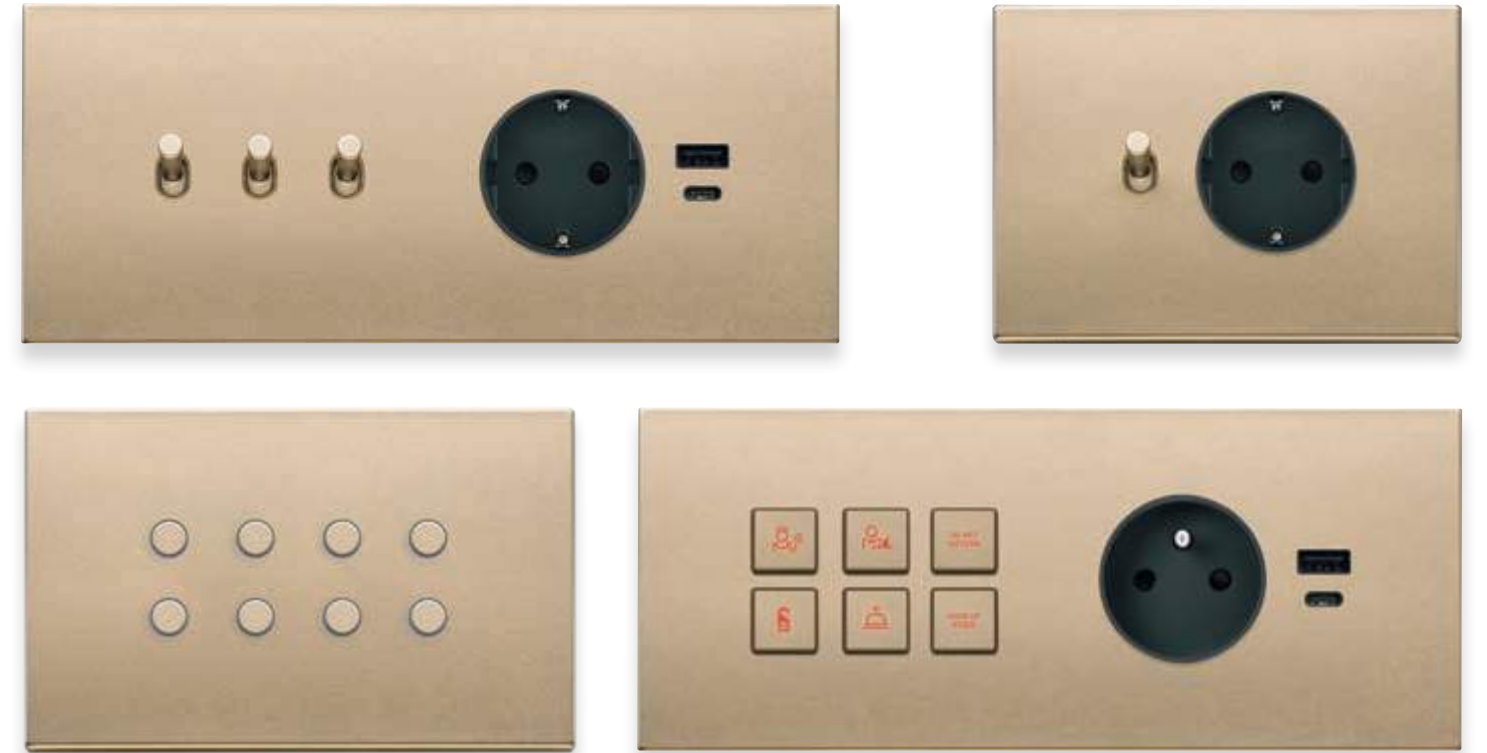

The Eikon series offers a comprehensive range of solutions to customise your system and strike the perfect balance between styling and technology. Special finishes comprising metals, leathers, glass and stoneware.

A versatile system.

Modular design to suit the needs for your international projects

Easy to match the style to accommodate various installation requirements for home or hospitality applications. Our cover plate offering is distinguished by total versatility in terms of both modular design and installation; for example, match round sockets with the functions and style of the Eikon Exé range for a distinctive effect and simplifying everyday gestures.

From two, three and four modules, through to seven modules to optimize several devices within a single cover plate offering superior styling value. For your international projects, we offer cover plates with between 1 and 21 modules and multi-module cover plates for both vertical and horizontal installation, to design bespoke systems and manage energy in complete safety according to the different international specifications.

Personal design for unmistakable environments

Added value to your identity.

To enhance the identity of the accommodation facility, cover plates of the **complete Vimar range - Eikon, Linea, Arké** and **Plana** can be engraved with a logo provided by the customer. Laser technology allows you to reproduce any symbol associated accurately with the command, for a long-lasting result.

Vast library of symbols to create an intuitive user experience.

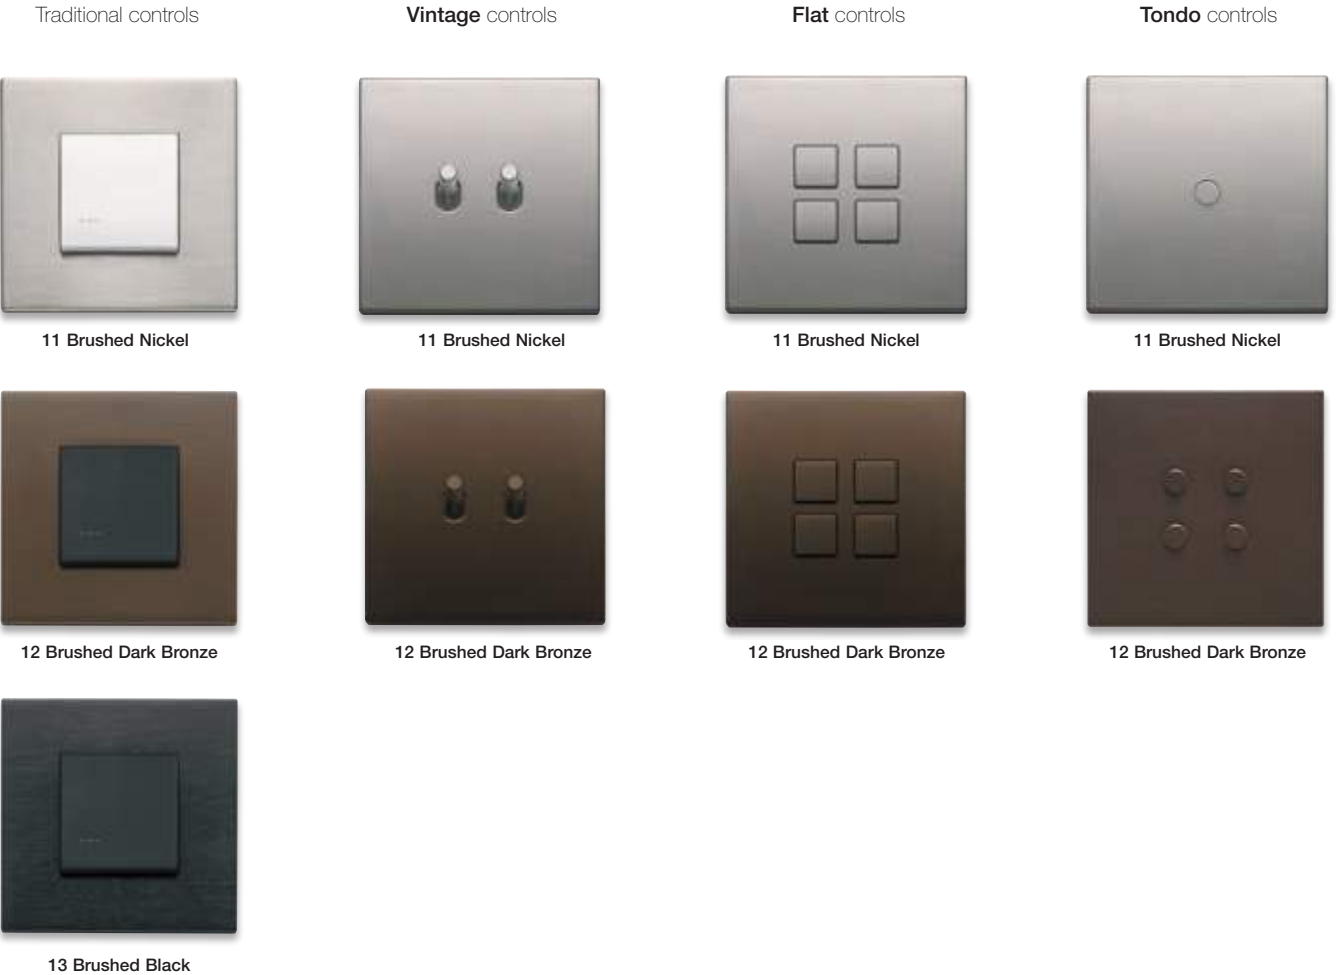

Buttons and controls can also be customised according to the chosen function. Laser technology makes it possible to replicate any symbol accurately, choosing from an extensive gallery of pictograms that identify the most widespread functions. Thanks to RGB technology, customers can also choose the colour of the backlighting.

Eikon Exé. Total Look metals

Styling continuity and discrete tones for total immersion. Striking simplicity in three timeless shades.

Eikon Exé. Brushed metals

Sophisticated finishes embellish a simple charm. The tactile nature of the material is enhanced by a delicate finish on the surfaces in three versions.

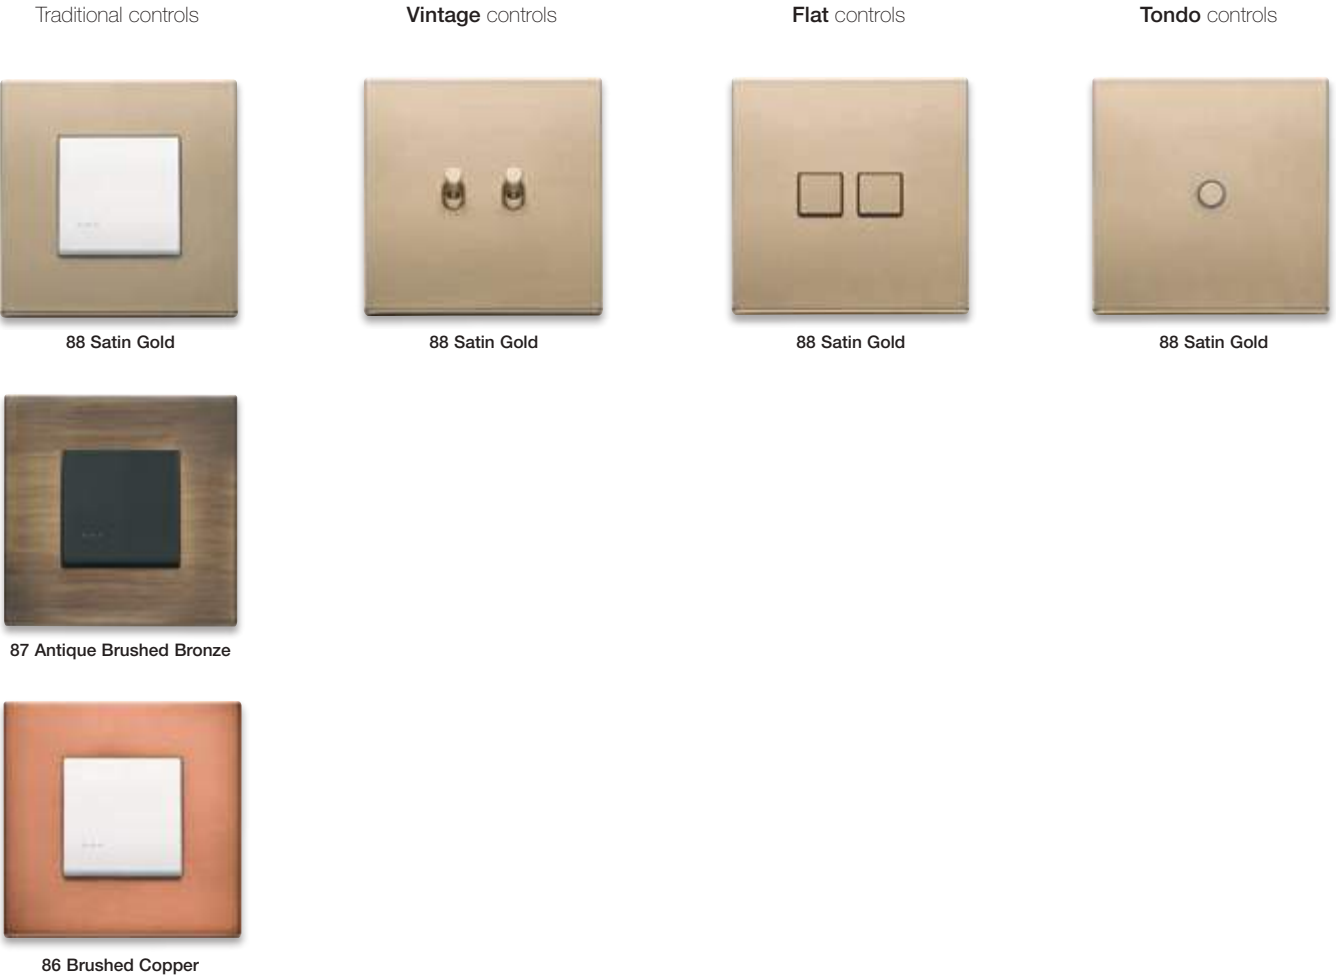

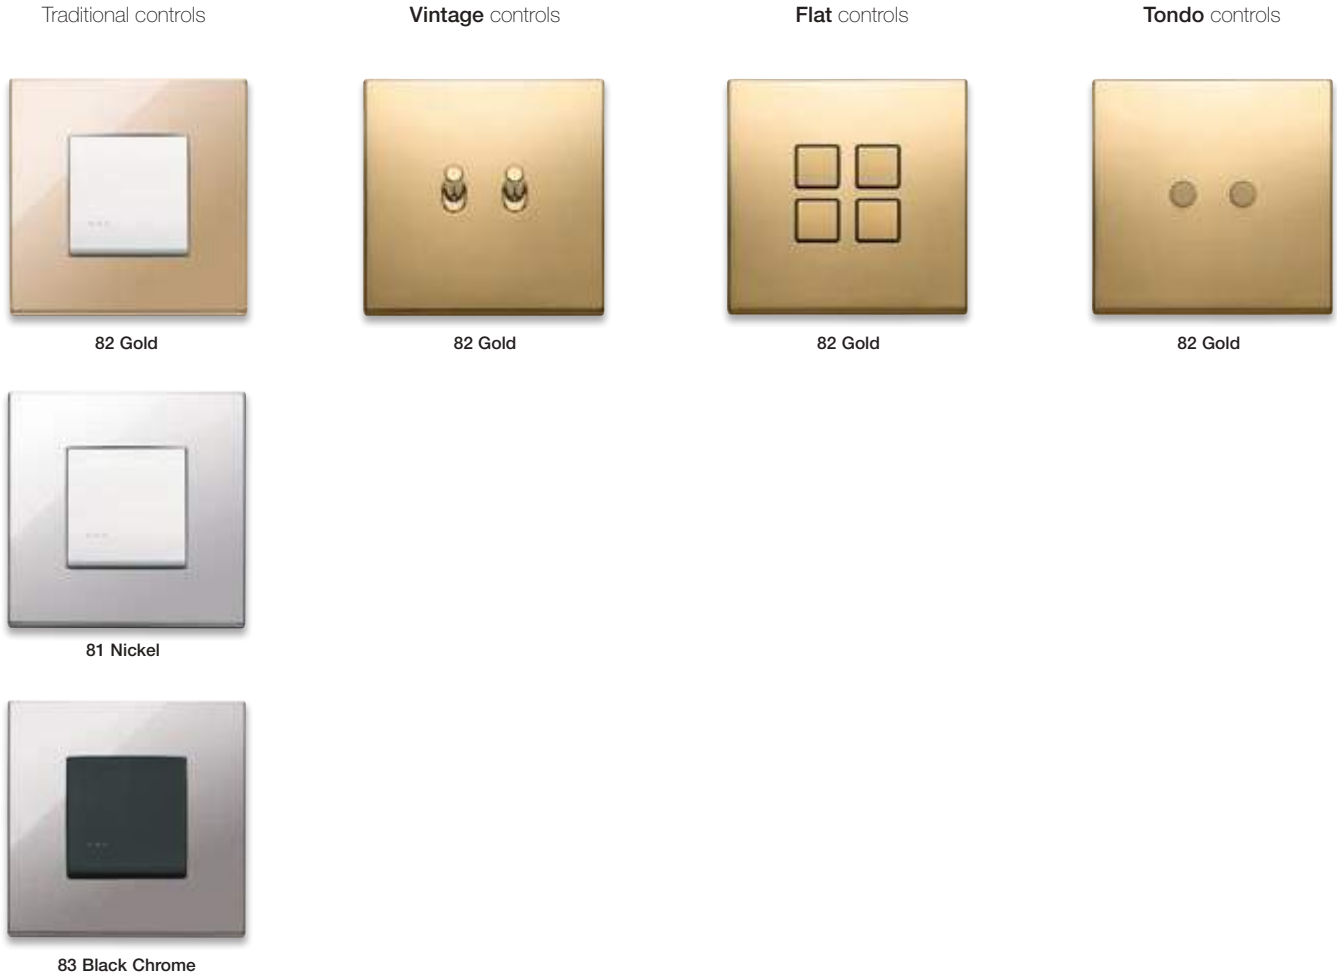

Eikon Exé. Polished metals

Shiny glints to brighten up the environments. The gaze loses itself in an alluring shiny surface.

Eikon Exé. Exclusive metals

Sophisticated finishes embellish the surface thanks to the elegance of satin-finishes and the irregular hues.

Eikon Exé. Glass

Transparencies and games of light teamed with unique details. Surfaces that are screen-printed on the back and flush-ground polished edges in three designs.

71 Milky White

72 Canvas White

73 Satin Black

Eikon Exé. Mirrors

Elegant solution that lights up environments and create depth. Reflections and lights that interact with the interiors. Reflective surfaces emphasised by a polished edge flush-grinding process.

75 Ice Silver

76 Shiny Bronze

77 Opal Brown

Eikon Exé. Marbled stoneware

Textured strength of marble, featuring elegant irregularities and typical vein patterns. The ultimate quality for a material that recalls the most exclusive stones.

51 White Calacatta

52 Coffee Brown

53 Black Marquiña

Eikon Exé. Wood

Warmth and vitality of a natural material par excellence. Three different natural wood finishes.

31 Oak

32 American Walnut

33 Eucalyptus

Eikon Exé. Leather

Classic tones with a highly tactile appeal. A soft and sophisticated material rendered unique by its slight imperfections.

With Linea, we have redesigned energy. The result is a new design with understated shapes and a distinctive profile that makes it truly unique

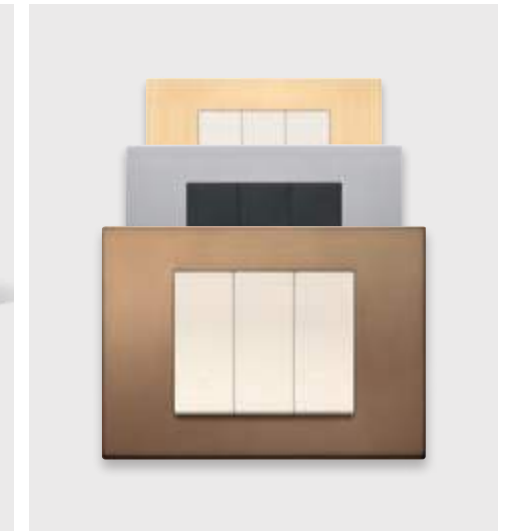

-80% 
CO₂ eq. emissions

Linea. A virtuous example

We certify our commitment to environmental, economic and social sustainability. The Linea series is a virtuous example: it **replaces 70% of traditional fossil-based plastics with plastics from renewable and recycled sources** and, thanks to the optimization of industrial production processes, the efficient management of product volumes and the use of FSC certified eco-friendly packaging, **CO₂ emissions are reduced by over 80%** saving 500 tons equivalent per year.

Savings of over 500 tonnes of CO₂
equivalent per year

97% of Linea's production contains plastics from renewable and recycled sources from an ISCC PLUS certified supply chain (mass budget, the certified quota varies for different products), helping to significantly reduce the environmental impact.

100% of all packaging is designed to be fully recyclable
Cardboard, packs and containers are all made from recycled material, printed with water-based ink and make exclusive use of eco-sustainable glues. We use cellulose sourced from FSC-certified, a guarantee from forests managed in a responsibly and sustainable way.

Finishing process for PVD (Physical Vapour Deposition) metal cover plates. Painstaking care taken with the choice of materials, including zinc-titanium alloy cover plates that allow a cold forging process and PVD finishes, with prestigious and eco-sustainable metallic effects.

Linea. Unique line.
Essential, connected, intuitive and sustainable

Linea

-80%

XT platform

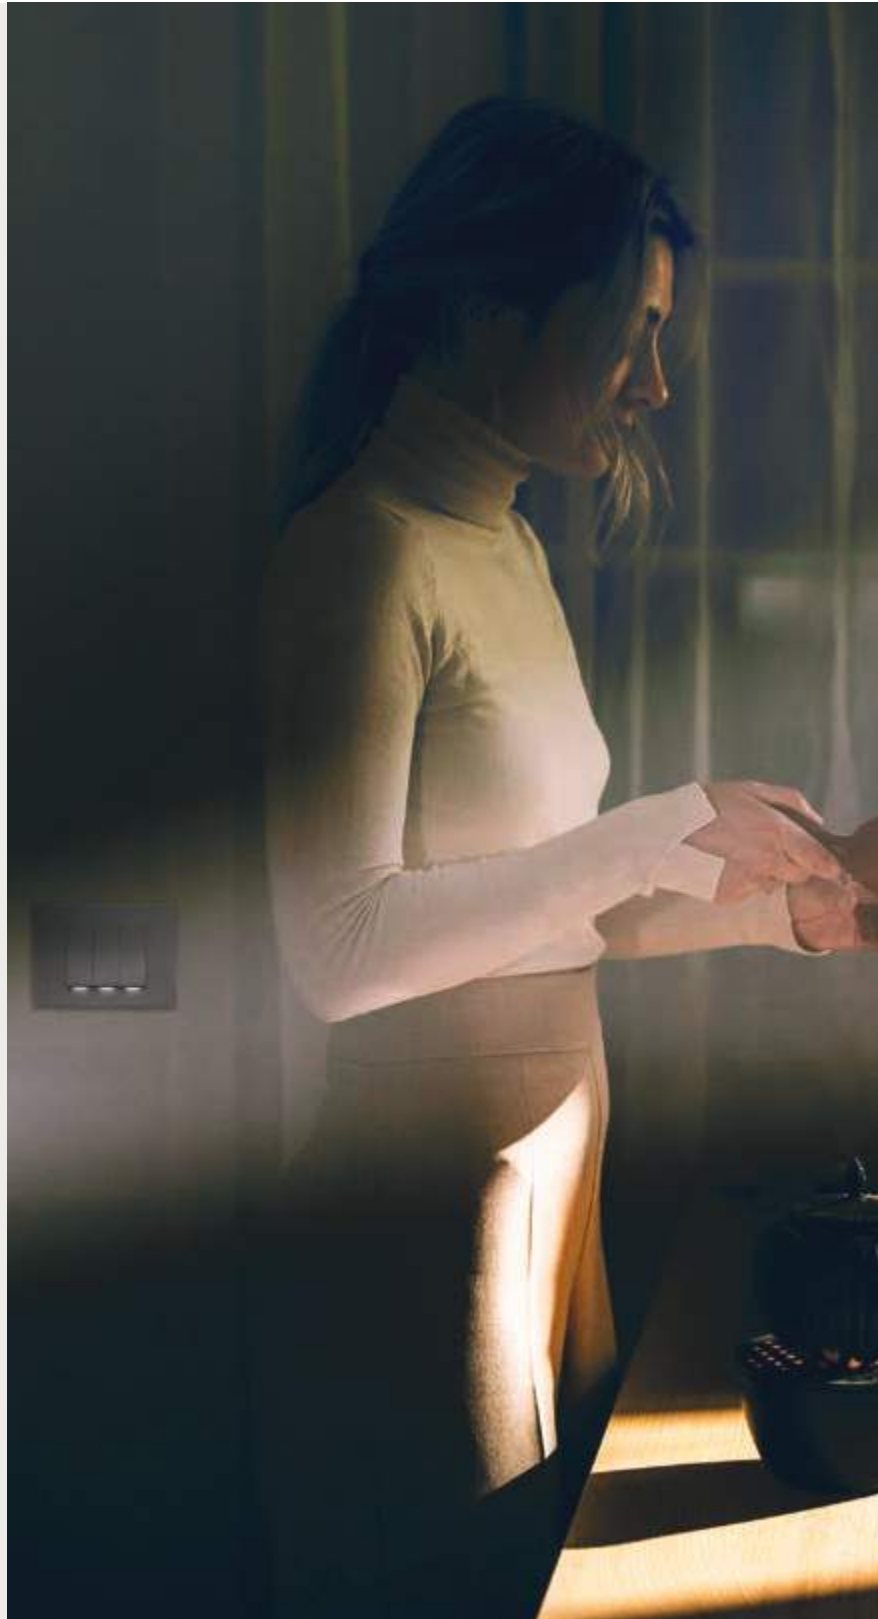

Aligned controls

Axial controls

Home automation controls

An original and elegant design, combining the essentiality of a refined aesthetic with the most advanced technology. With Linea, innovation meets tradition also thanks to numerous registered patents, which make it unique in its kind.

An enhanced user experience. Linea is also digital, thanks to the innovative XT platform, a high-tech experience for the automated home. Absolute flatness of controls.

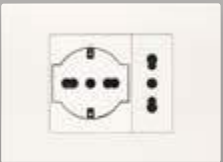

Linea

with aligned controls

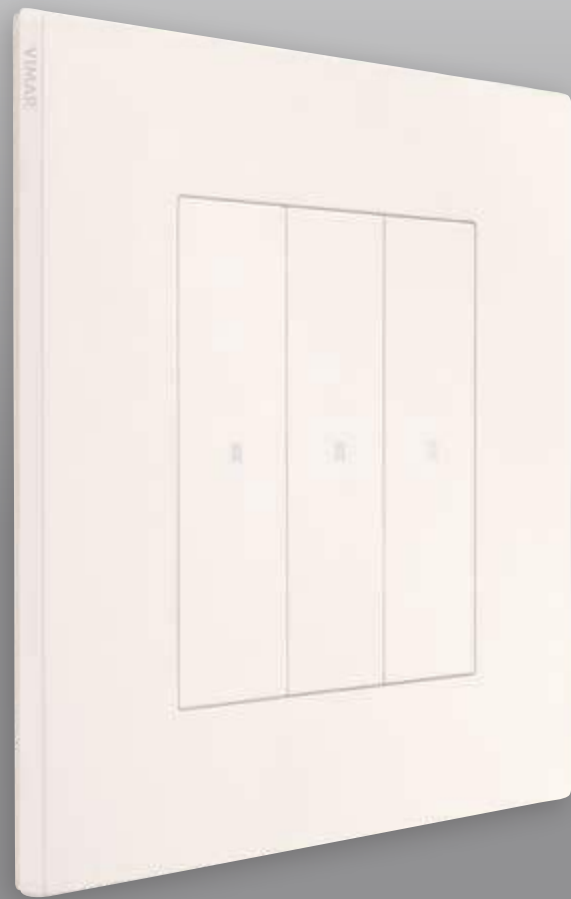

The unique shape of the aligned control: starting with a sophisticated flatness, the gently curved profile of the control creates a light protrusion, making it extremely user-friendly. Possibility of creating a vertical downward light beam, choosing between a LED lighting unit with standard brightness or a softer one that creates a soft glow on the surface of the cover plate, a discrete yet distinctive effect on the wall.

Linea
with axial controls

Linea
with home automation controls

Perfectly flat surface of the axial control, slender and slimline design with a generous control surface thanks to the increased height of the button and the possibility of pressing any part of the surface. Linea is connected thanks to the smart and home automation versions and connects living spaces to small and large needs of everyday life. Anywhere and for anyone.

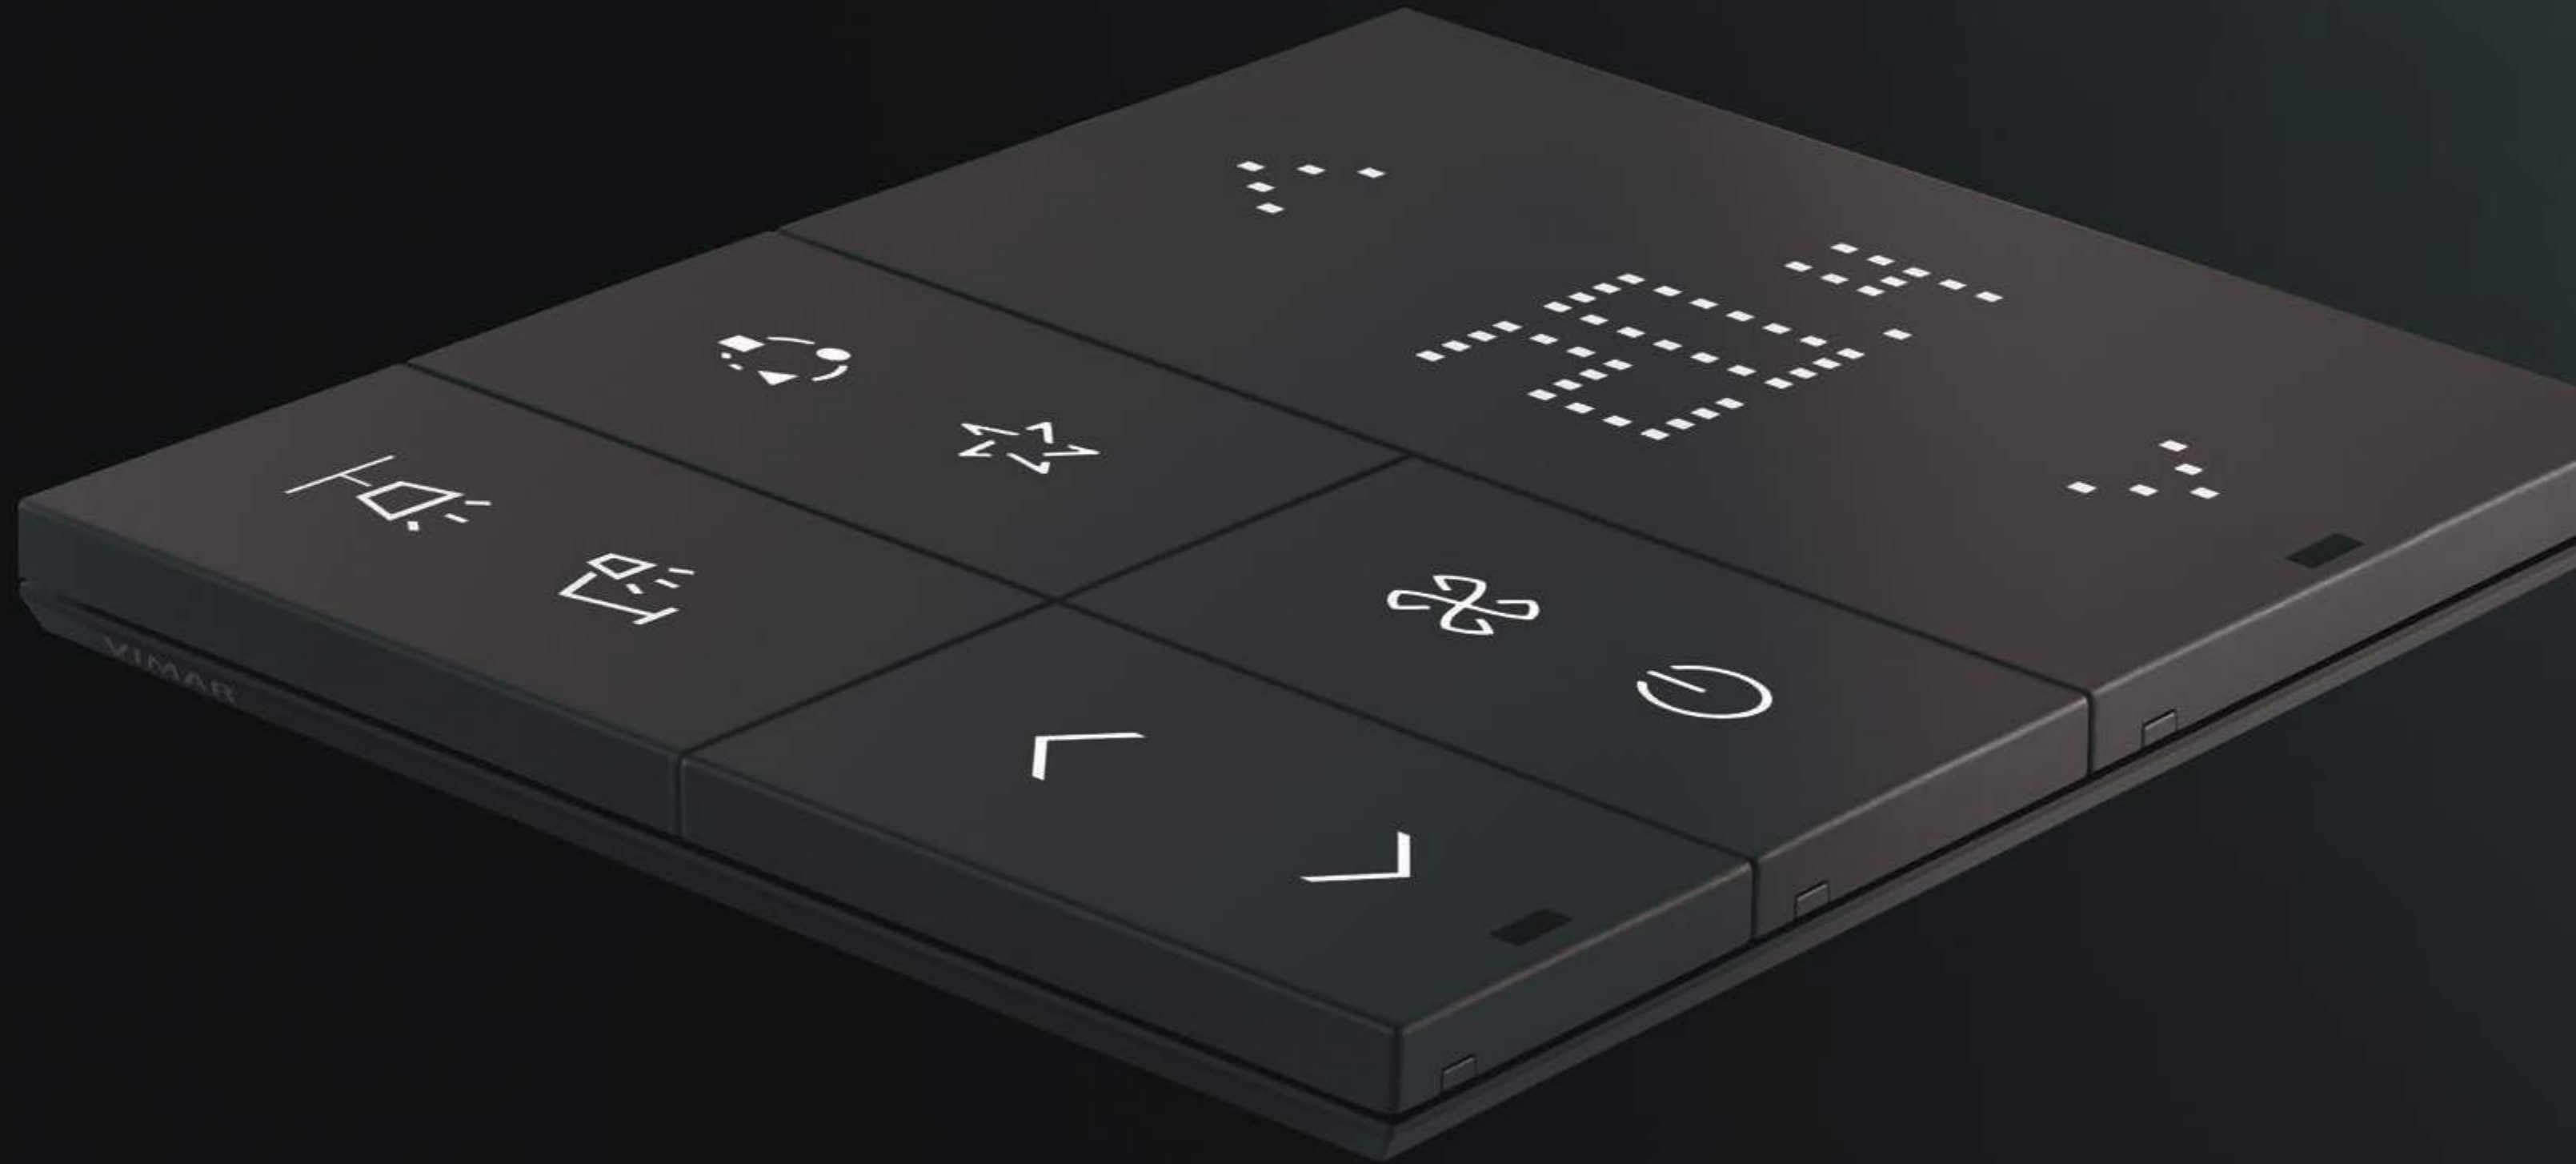

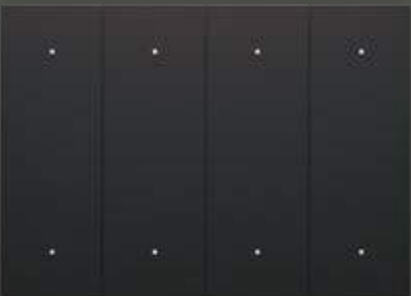

Linea

with XT platform

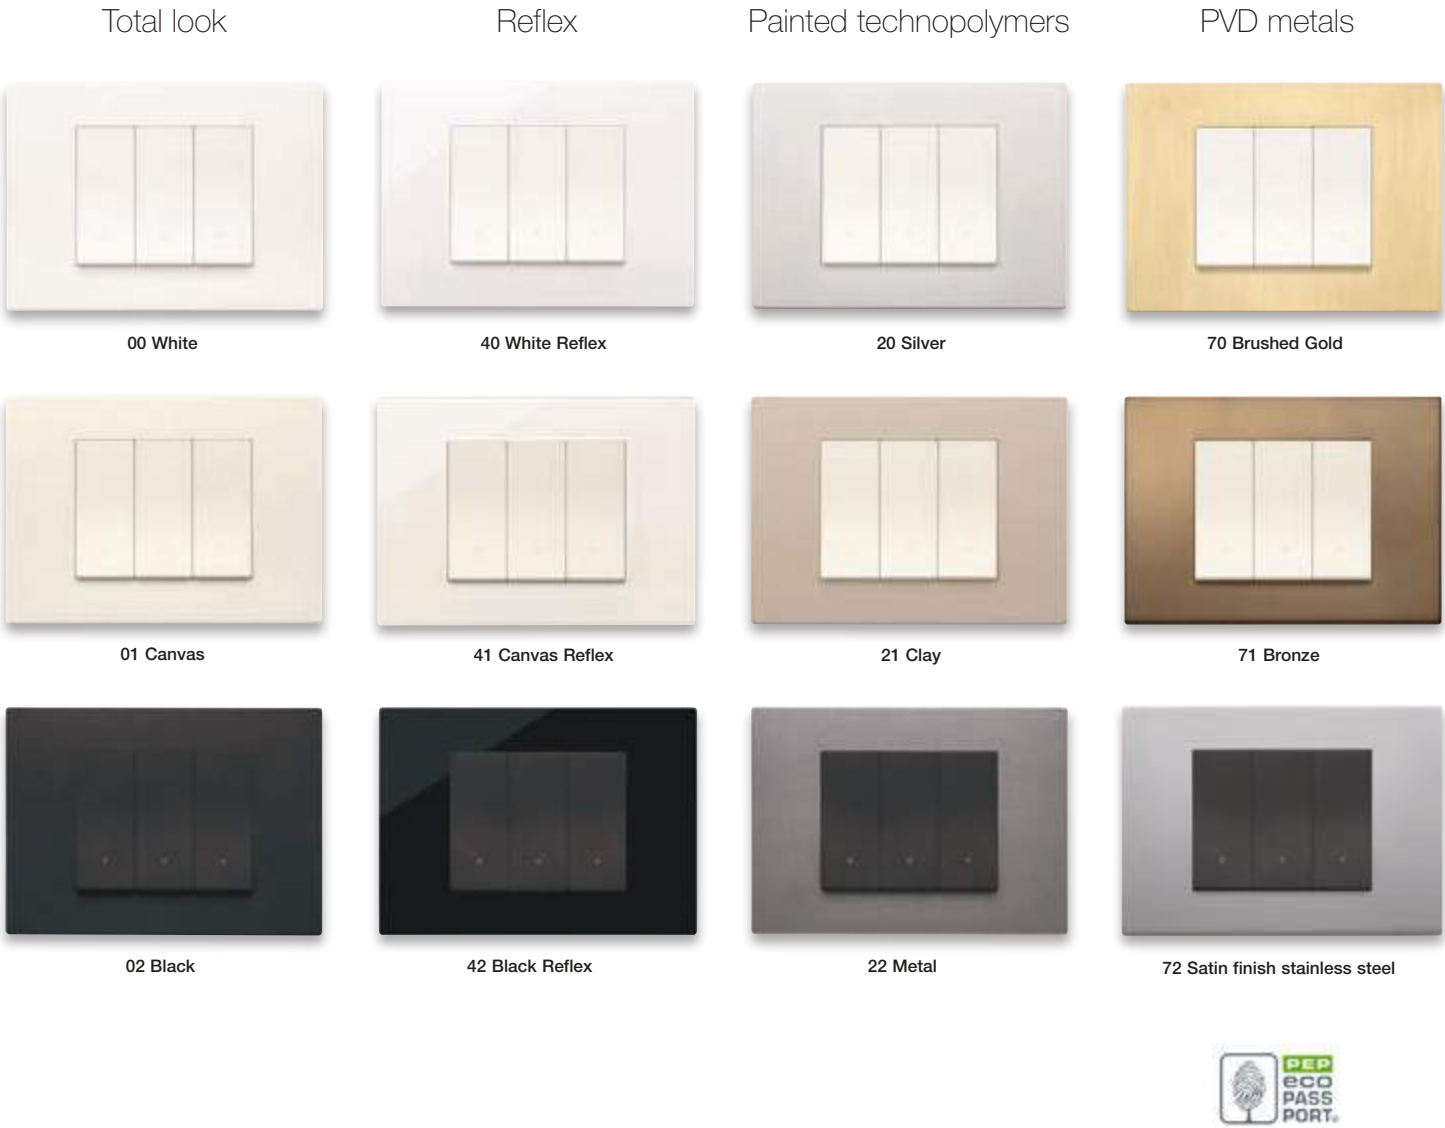

Makes your home naturally smarter. The XT platform stands for an innovative high-tech experience for the connected buildings, with full-surface controls for a distinctive perfect flatness that makes it one of a kind. The XT platform is dynamic thanks to an extensive scalability and expandability of controls. With a simple gesture, you can move the front to other control devices, without any wiring.

Linea. A meticulously selected range of finishes

Linea offers an offer of 12 cover plate finishes that can enhance any environment with a discreet style, with particular attention to the choice of materials.

Elvox Door Entry

The beauty of communicating with the outside.
Simply and safely

Seeing what goes on outside the home, recognising those who ring our doorbell, even when we are out, and communicating accurately are all crucial operations for living a quiet life. This is why we need access to sophisticated solutions based on innovative technology and a comprehensive range that can ensure the safety and clarity we require by simultaneously combining user-friendliness with a system that is simple to install.

Tab 7S Up

Tab 5S Up

For total control, even when you are out and about. Video entry phones distinguished by the light weight, elegance and understated silhouettes that distinguish all the models. They provide a perfect image of what is going on outside thanks to the 7" and 5" monitors.

Vimar View

Voxie (handset)

Simplicity at hand. Simple yet high performance entry phones. Linear, contemporary design, complete with all the necessary functions. Hands-free or with a handset. Ideal when replacing old entryphones.

Voxie (hands-free)

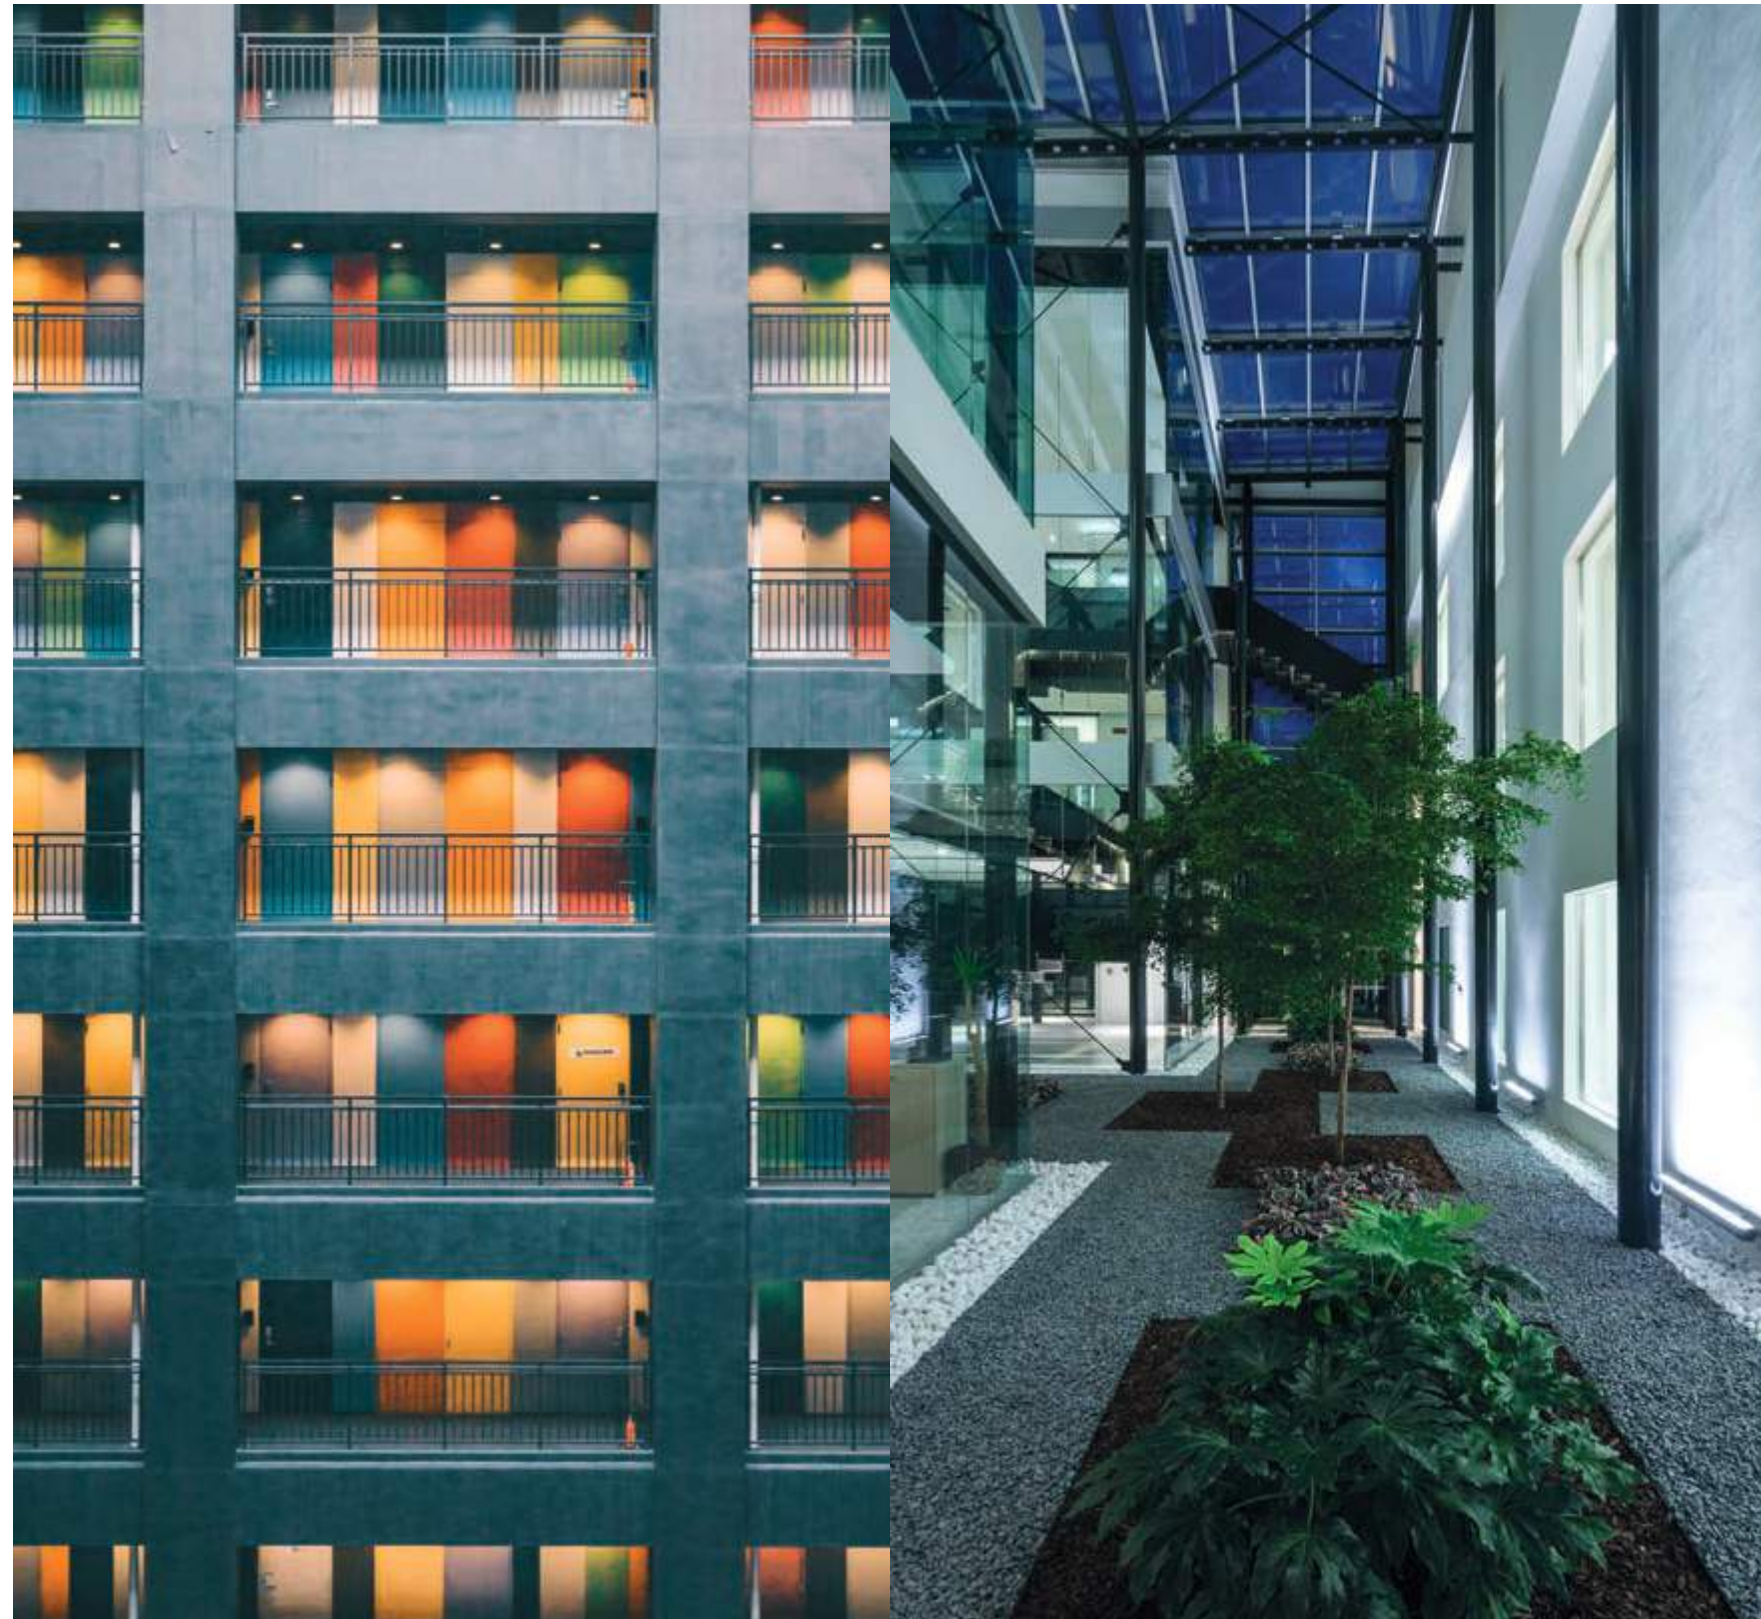

Roxie

Roxie video entrance panel with Due Fili Plus technology, brings together robust design, versatility and state-of-the-art technology to offer a safe and smart access control and call management system.

Our projects all over the globe

Residential, hospitality, tertiary sector or marine, regardless of the field of application, our solutions always succeed in enhancing the look of every architectural style and meeting all the modern-day living requirements in all kinds of contexts.

Residential

Choosing a single partner who meets all the needs of the smart Home and Building automation: the safety of entering and leaving your home with the utmost freedom and comfort, thanks to functional products and integrated solutions that bring together technology, innovation, reliability and design.

1 & 2. Househut Private villa, Reggio Emilia 3. Private apartment, Porto Viro 4. Private villa, Treviso 5. Oceano residence, Guernsey

Hospitality

Modular solutions for all accommodation facilities: designed to offer guests the very best in comfort and safety. Ensuring the matching styling of all the devices installed to guarantee both energy efficiency and complete control of the accommodation facility, irrespective of its size, from huge hotel chains to small boutique hotels and B&Bs.

1. The Barracks Hotel Sentosa, Singapore 2. Hotel Riu Palace Luxury hotel, Tikida Agadir 3. Pullman Phu Quoc Beach Resort, Vietnam
4. Golden Lake Hotel, Vietnam 5. Hyatt Centric Tiara, Dubai

Offices and public spaces

The advantage of choosing a partner capable of supporting the customer right from the start, analysing the plant engineering project together. A service affording high added value which makes the project completion quick and simple.

1. Microgate Headquarters, Bolzano 2. Guardini Headquarters, Turin 3. Platform Basket offices, Reggio Emilia
4. Emergency Headquarters, Milan 5. Respite Care Home, Faroe Islands

Marine

The integration of home automation functions and automations also applies to the naval and marine sector, enabling the smart management of vessels while guaranteeing on-board comfort: whether your field is cruise liners, luxury ships, power yachts or sailing boats, while offering the very best Italian design and ample scope for customisation.

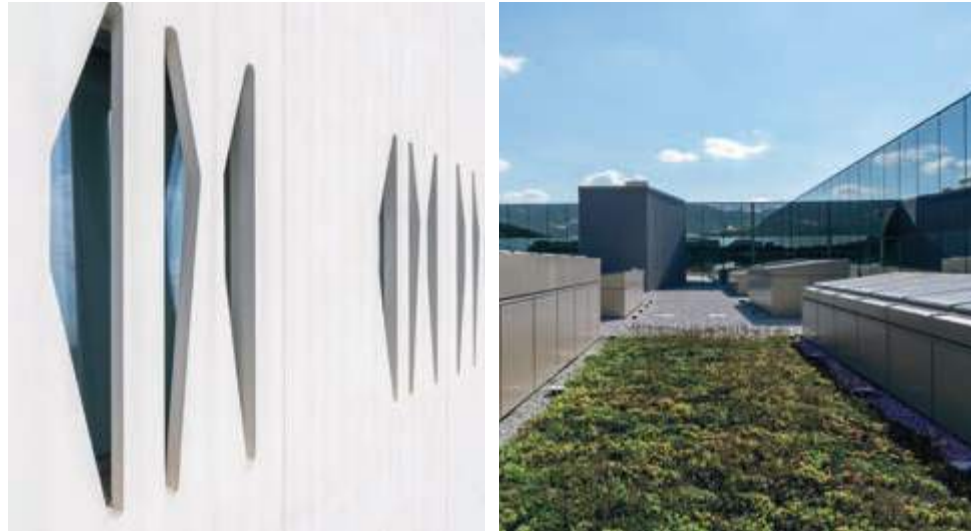

1. San Lorenzo privato yacht 2. Private yacht 3. Princess Yacht X95 4. Hanse private sailing yacht 5. Costa Venezia, Costa cruise ship

Make it Circular. Sustainability

Products assessed from an LCA perspective

We assess the environmental performance of Vimar high-rotation products according to the Life Cycle Assessment (LCA) approach, according to the international reference standards ISO 14040 and 14044. The process is part of the Environmental Product Declaration (EPD).

PEP (Product Environmental Profile) Ecopassport

These certifications are available for all high-rotation products including Eikon, Linea, Arké, Plana series and junction boxes. They are indicated with a specific mark on each product sheet at www.vimar.com.

We design to be integrated with other players.

Products and green building rating systems: we create products that can contribute to the score of the most popular building sustainability protocols, such as LEED®, BREEAM® e WELL®.
